GREENERY/PLANTS/GRASSES

IMPERATA C RED BARON #1

Warm-season grass with foliage that emerges bright green with wine-red stained tips. Prefers moist, fertile soil and full sun. Slow to establish. 12" - 18".

PANICUM V SHENANDOAH #3

Green Summer leaves turn reddish by July and deepen as the season progresses. Combines well with tall sedums, cone flowers, joe pye weed, boltonia, and other ornamental grasses. 3' - 4'.

ZEBRA GRASS

Ornamental grass that matures 7' tall and 3' - 5' feet wide. Prefers full sun. Blooms in late Summer and is silvery-white in color.

GREENERY/PLANTS/GRASSES

PANICUM V HEAVY METAL #3

Stiffly upright metallic blue grass with a very attractive form. The color remains true through the season until Fall when it turns a bright yellow. 4' tall.

BABY GEM BOXWOOD

Prefers adaptable, well-drained soil type and partial - full sunlight. Is somewhat drought tolerant. Mature height 3'-4'. Mature width 3'-4'. Fall color green.

GREEN VELVET BOXWOOD

Dense, rounded, evergreen shrub. Foliage is finely textured and glossy dark green. Naturally slow growing and rounded in shape, so little pruning is required. Blooms in Spring with inconspicuous flowers. Mature height 3', mature width 3'. Prefers full sun to shade and requires well-drained soil with mulch to protect surface roots.

GREENERY/PLANTS/GRASSES

MR. BOWLING BALL

A unique, compact, perfectly global arborvitae with dense, fine-textured, soft, sage-green foliage resembling a juniper or false cypress. Requires little or no shearing.

ARBORVITAE

Fast growing, cold hardy Western Arborvitae. Excellent Winter color. Deer resistant. Tight pyramidal habit works nicely in landscape designs, especially for creating fast-growing privacy screens.

FERN-MATTEUCCIA STRUTHIOPTERIS #1

Tall fern with upright, triangular, feather-like fronds. Vase-shaped plant, best grown in a shady location in a slightly acid, high humus soil with good moisture. 3' - 4'.

GREENERY/PLANTS/GRASSES

HOSTA BLUE MOUSE EARS #1

Small, round, gray-green leaves with thick substance. Lavender flowers on short scapes in midsummer. Small.

PATRIOT HOSTA

Heart-shaped leaves with dark green centers and a large, crisp, white edge. More sun tolerant than most hostas. Large. 22" by 30".

HELICTOTRICHON SEMPERVIRENS #3

Flowers in early Summer, but grown primarily for its blue foliage. A cool season ornamental grass suitable for a rock garden, as an accent or specimen, or in mass plantings. 2' - 2 1/2'.

GREENERY/PLANTS/GRASSES

EMERALD GREEN ARBORVITAE

Narrowly pyramidal, dense, evergreen shrub. Perfect as a green screen or privacy hedge. Foliage is bright, emerald green, holding its color through Winter. Easy to grow with a moderate growth rate.

TAXUS BUSH (PYRAMID)

Bright green pyramidal conifer is highly versatile. Fine textured foliage bears a soft, lush appearance and reddish bark. Good for screen, windbreak, or background. Tolerates considerable shade. Mature height - 30". Mature width - 20". Prefers full sun to part sun and well-drained soil.

TAXUS BUSH SQUARE (TAXUS M DENSIFORMIS 15")

A compact moderate growing evergreen with a rounded growth habit reaching 4' tall and wide. Foliage is a larger more scalloped glossy green leaf that requires minimal pruning. Perfect for borders and hedging.

GREENERY/PLANTS/GRASSES

EUONYMUS FORTUNEI (IVORY JADE)

Very hardy and evergreen and year round visible. Ideal as a compact hedge or for mass planting. Inconspicuous white flowers in Spring. Tough, low growing, low maintenance. Mature height - 1.5' Mature width - 2'. Prefers full sun to part shade. Is tolerant of most soils except wet ones.

HEUCHERA FIRE CHIEF

A coral bell with wine red foliage and very free flowering stems of bicolor dark pink and white flowers. Attractive to pollinators and hummingbirds. Foliage height 9", flower height 18". Prefers part sun and moist/well-drained soil.

HEUCHERA GRAPE EXPECTATIONS

Silvery purple leaves highlighted by dark purple veins. Produces creamy white flowers on tall dark purple stems in midsummer. Prefers morning sun and afternoon shade. 12" mature height. Prefers full sun to part sun and evenly-moist, well-drained soil.

GREENERY/PLANTS/GRASSES

CAREX EVERILLO

Leaf blades emerge lime green, then turn golden yellow. Color is best in a location with morning sun. In deep shade, color remains chartreuse. Prefers moist, well-drained soil. 12" mature height.

DIERVILLA S COOL SPLASH

A fast growing, very attractive shrub with striking foliage of leaves with green centers and white margins. It's quite hardy with inconspicuous yellow flowers. Mature height - 3'. Mature width - 3'. Prefers full or part sun and well-drained soil.

EUPHORBIA BONFIRE

Deep purple, red, and orange leaves with a touch of chartreuse. Sulphur yellow bracts in spring. Forms a rounded mound. Foliage remains reddish all season. 12" - 18" mature height. Prefers full or part sun and well-drained soil.

GREENERY/PLANTS/GRASSES

JKETELEERI UPRIGHT JUNIPER

Vigorous, broadly pyramidal evergreen perfect for privacy hedges, windbreaks or screens. Foliage is light olive green. Easy to grow and fast. Can be lightly sheared.

GORDO BOXWOOD

A compact moderate growing evergreen with a rounded growth habit reaching 4' tall and wide. Foliage is a larger more scalloped glossy green leaf that requires minimal pruning. Perfect for borders and hedging.

FLOWERS (PERENNIALS)

RUDBECKIA AMERICAN GOLD RUSH #1

An improved form of the classic Black-eyed Susan with a naturally compact habit. Foliage is thinner and hairy. 22" - 26"

CORAL BELLS

Bronzy-purple leaves forming a mounded clump 10 - 14" tall.

Tiny sprays of creamy-white flowers in late Spring, attracting hummingbirds and butterflies. Easy to grow. Prefers part shade but can tolerate more sun than most coral bells. Deer resistant.

PAEONIA DUCHESSE DE NEMOURS #2

A fragrant white peony with double flowers. Attractive, glossy green foliage and strong stems. 34" tall.

FLOWERS (PERENNIALS)

HYDRANGEA LITTLE QUICK FIRE

Early Summer white flowers become pink-red as they mature; the flowers have some fragrance. Compact size needs little pruning except to remove old flowers. Very easy to grow

HYDRANGEA PAN BOBO

Large white blooms cover the plant throughout the Summer and strong stems hold them up well. In Fall, the flowers fade to pinkish. A dwarf form. Mature height - 3'. Mature width - 5'. Prefers full to part sun. Tolerant to most soil types.

HEUCHERA CARAMEL

Caramel-gold foliage and small creamy-white flower spikes. A strong grower with good heat tolerance. Best with morning sun and afternoon shade. Grows 10"-15" tall and 12"-15" wide.

FLOWERS (PERENNIALS)

KALIMERIS DAISY MAE

Single, one-inch, daisy-like flowers on a compact plant. Easy to grow. Heat, humidity, and drought tolerant, attractive to butterflies. Prefers well-drained areas in full sun. 2'

DIANTHUS PAINT THE TOWN MAGENTA

3/4-1" wide, single vibrant magenta-pink flowers in early Summer. Grows best in full sun to light shade in well drained soil. Deer resistant. Attractive to butterflies.

HEMEROCALLIS HAPPY RETURNS #1

2 1/2" lemon yellow blooms in late Spring and sporadically until frost. Excellent for mass plantings or mixed in the border. Should be divided every two or three years for maximum rebloom. 18" tall.

FLOWERS (PERENNIALS)

HEMEROCALLIS STELLA D'ORO #1

Bright golden yellow flowers starting in late Spring, followed by waves of bloom into early Fall. For best rebloom, divide every few years and nourish soil. Attracts butterflies. 12" - 18". Prefers full sun to part sun and average, well-drained soil.

LIRIOPE (DIFFERENT VARIETIES)

Dark green, grass-like foliage with non-spreading habit. Narrow spikes of lilac-purple flowers in late Summer. Widely used for for edging and accent. 12" - 18" tall.

SPILLED WINE WEIGELA

Dark red, wavy leaves with pink-magenta flowers that appear in Spring with some reblooming during the Summer. Low spreader. Easy to grow. Mature height - 2'. Mature width - 2'. Prefers full sun and average, well-drained, very adaptable soil.

FLOWERS (PERENNIALS)

KNOCKOUT ROSES

The unique coral color is even stronger in hot, humid climates. It blooms from Spring through Fall. Young foliage is bronze red.

Mature height - 4.5. Mature width - 4.5. Prefers full sun and well-drained soil.

SALVIA BLUE MARVEL #1

A compact selection with bright violet blue flowers. Attractive to butterflies and other pollinators.
10 - 12"

HYDRANGEAS

Upright, open, native deciduous shrub. A more refined and compact variety. Blooms in mid summer with large, dense white flowers that fade to pink. Foliage is dark green changing to red bronze in the Fall. Handsome exfoliating cinnamon colored bark. Requires some Winter protection and mulch over roots. Easy to grow.

FLOWERS (PERENNIALS)

CONEFLOWERS

Large, fragrant, magenta-purple blossoms on compact 15"- 18" plants. Part of the Butterfly Series. Excellent for attracting butterflies, pollinators, and songbirds.

HELLEBORUS WEDDING PARTY MIX #1

Colors in the mix include black, mauve purple, white, yellow, and pink. Will tolerate morning sun. 18 - 24". Prefers part sun to shade and average, well-drained soil.

HIBISCUS

Large, 8" white flowers with medium pink edges and a dark red eye. Late to emerge in Spring. 4' - 4 1/2'. Prefers full sun and evenly-moist, average, well-drained soil.

FLOWERS (PERENNIALS)

ASTILBE RHEINLAND #1

Bright, clear rose pink plumes.

Astilbes grow best in a cool, humus-rich soil that does not dry out in Summer. Attractive in mass plantings. 24" tall. Prefers part sun and evenly-moist, well-drained, compost enriched soil.

CLEMATIS BLUE ANGEL #2

Pale lavender blue 4"-6" flowers with crinkly edges. Very free flowering and holds well as a cut flower.

Grows 8'-12'.

AMSONIA BLUE ICE

A long-blooming, compact selection with lavender-blue star shaped flowers in May and June.

Easy to grow, drought tolerant once established. Brilliant yellow Fall color. Deer resistant.

12" - 15".

FLOWERS (PERENNIALS)

LAVANDULA MUNSTEAD #1

Fragrant, bright lavender-blue flowers above gray-green 12"-18" foliage. Good drainage is essential. Does best in full sun. For best survival do not prune lavender for the Winter.

CORAL DRIFT ROSE

Bright coral-orange blooms cover this small mounding shrub from mid-spring to mid-fall. Fully Winter hardy and disease resistant.

PHLOX SUB SNOWFLAKE #1

Masses of tiny white flowers on low-growing, compact mats of needle-like foliage. Prefers a gritty soil in full sun. 2"- 6".

FLOWERS (ANNUALS)

PETUNIA

Prefers full sun and well-drained, fertile soil. Semi-frost hardy. 6" - 24" tall and up to 36" wide. 3" - 4" blooms in various colors.

GERANIUM

Prefers full sun to light shade and well-drained, rich soil. Semi-hardy to frost. Mature height 6" - 4' tall. Blooms 2"-4" in various colors.

MARIGOLD

Prefers full sun to part shade and well-drained, fertile soil. Tender to semi-frost hardy. Grows 6" - 3' tall.

FLOWERS (ANNUALS)

ZINNIA

Available in an array of forms and vibrant hues, with sizes varying from petite dwarfs to towering stems. Prefers full sun to part shade and well-drained soil. Sensitive to frost and can reach a mature height of 1' - 4' tall.

SNAPDRAGON

Prefers full sun to part shade and well-drained, rich, moist soil. Semi-hardy to frost. Mature height 6" - 48" tall. Blooms in tall flower spikes with 1"-2" blossoms in various colors.

IMPATIENS

Prefers partial to full shade and moist, well-drained, rich soil. Sensitive to frost. Mature height 6" - 24" tall. Bloom size 1"-2" in various colors.

FLOWERS (ANNUALS)

BEGONIAS

Prefers part shade and moist, rich soil. Frost sensitive. Mature height of 8" - 3' tall. Blooms in white, yellow, orange, red, or pink.

SUNFLOWER

Prefers full sun and well-drained, moist neutral soil. Semi-frost hardy. Mature height 2' - 10' tall and 4" - 20" orange, yellow, and red blooms.

PANSY

Prefers partial shade and rich, moist, well-drained soil. Is frost-hardy. Mature height 9" - 12" tall. Blooms 1" - 4" bicolor or solid blooms in various hues.

TREES

MAPLE TREE (CRIMSON SUNSET)

Its foliage emerges deep purple, fading to maroon and reddish bronze in Fall. A compact and upright oval form means little trimming needed.

EASTERN REDBUD

Bears clusters of near-red buds that open a brilliant, fuchsia pink and clothe the bare branches in Spring. Heart-shaped leaves soon follow, maturing to blue green in Summer and turning yellow in Fall. An easy-care addition to the landscape, lawns, shrub borders, woodland margins, or along patios. Attractive in naturalized settings. Mature height - 25'. Mature width - 25'. Prefers full sun to part sun Soil and moist, well-drained, fertile soil

NIOBE WEeping WILLOW

Large-growing shade tree. Upright weeping branches start out a soft golden color that deepens to yellow bark during the Winter months. Long narrow bright green leaves will contrast to the golden branching. Plant away from all types of piping, foundations and no less than 40 ft. away from septic field lines. Mature height - 40'. Mature width - 60'. Prefers full sun and moist to wet soils.

TREES

OAK TREE (QUERCUS NIGRA #3)

Oak is a conical to round-topped tree with thick, leathery, leaves. The shiny, dark-green leaves are wedge-shaped and may have lobes at the tips. Foliage becomes yellow in Fall. Fast growing. Attracts birds, butterflies, other pollinators. Host for several butterfly species. Mature height - 100'. Prefers part shade and deep, moist soil.

FLOWERING DOGWOOD (CORNUS ALBA TOUCH OF ELEGANCE #3)

Light green and white leaves cover this very compact Dogwood. Small, creamy-white flowers bloom in late Spring. Red stems provide color in Winter. Attracts birds.

OHIO BUCKEYE (AESCULUS GLABRA #15)

Large growing tree. Good for naturalizing in open sunny or shady locations. Medium growth rate. Attracts birds and butterflies. Mature height - 40' and mature width - 20'. Prefers full to part sun and moist, well-drained soil.

TREES

BIRCH (BETULA WHITESPIRE CLUMP 16')

Leaves are a glossy dark green, turning yellow in the Fall. The bark is a smooth, chalky white, but does not exfoliate. It is fine textured and distinctly pyramidal.

Will always require watering during prolonged droughts. Mature height - 35' and mature width - 20'. Prefers full sun and moist, well-drained soil.

SPRUCE (PICEA PUN MONTGOMERY #3)

A slow growing spruce with silver blue foliage. It starts out broadly rounded but will eventually develop a leader and mature into a broad cone. Grows about 1"-6" per year. Mature height - 6' and mature width - 6'. Prefers full sun and moist, well-drained soil.

PINE (SCIADOPITYS VERT JOE KOZEY #6)

At maturity, this slow-growing tree becomes a large, spire-like pine. Mature height - 40' and mature width - 20'. Prefers full sun and moist, acid, compost-rich soil.

TREES

ASH (QUERCUS MUEHLENBERGII #7)

A deciduous tree in the white oak group with a clean, straight trunk and a narrow, rounded crown. The bark is light ashy gray and broken into thin, narrow flakes. Leaves are yellowish green in summer, turning yellow-brown or red in fall. The acorns mature in a single season.

CATALPA (CATALPA BIGNONIOIDES NANA STD #15)

Dwarf form that is grafted on straight trunk to produce a globe or mushroom shape. Fast growing and tolerant of wide range of conditions once established. Mature height - 15' and mature width - 10'. Prefers full sun and moist, fertile, deep soil.

ELM (ULMUS X TRIUMPH)

Upright in shape with glossy deep-green foliage. Notably drought-tolerant cultivar, which grows vigorously in almost all soils except for those which are excessively wet.

TREES

BEECH (FAGUS GRANDIFOLIA #10)

Known for its spreading canopy and distinctive smooth bark, American beech is a slow-growing tree found throughout the state. It is an excellent wildlife tree. Beech nuts are high in protein and fat and eaten by many birds and mammals. This native tree can adapt to soils of variable pH and composition but prefers rich, well-drained soils with constant moisture. While American beech is shade tolerant, it achieves best growth in partial to full sunlight.

CHESTNUT (FRUIT-NUT- CHESTNUT-AMERICAN #3)

Large, broad tree that produces an edible chestnut. Large leaves turn yellow and brown in autumn. Will bear nuts in 3-5 years. Needs a minimum of 2 trees for pollination, planted no more than 200' apart. Attracts birds and other wildlife. Mature height - 80' and mature width - 40'. Prefers full sun to part shade and moist, well-drained soil.

HICKORY (CARYA LACINIOSA #5)

A tall ornamental shade tree for large properties. Slow growing but potentially massive. Drooping lower branches. Large yellow-green leaves. Shaggy bark curling up at the ends. Edible large nuts for human and wildlife consumption. Mature height - 80' and mature width - 60'. Prefers full sun to part sun and rich, well-drained soil.

TREES

WALNUT (FRUIT-NUT- WALNUT-BLACK #3)

Forms a massive upright spreading tree producing large hard-shelled nuts in abundance. Good tree for larger sites and open spaces preferring deep well-drained soils but adaptable to almost any site. Note that roots of black walnut contain jugalone and are toxic to many plants. Mature height - 75' and mature width - 60'.

BASSWOOD (TILIA AMERICANA #3)

Stately and well-formed tree with heart-shaped leaves and a clean, straight trunk. Fragrant pale-yellow, small flowers that appear in the Summer. Mature height - 80' and mature width - 60'. Prefers full sun to part sun and average, moist, well-drained soil.

SYCAMORE (PLATANUS OCCIDENTALIS #3)

Sycamores develop a massive trunk with an open wide-spreading crown and have leaves that can grow to 9" in width. In Winter, the Sycamore's characteristic large patches of creamy white inner bark are prominent, making it a Winter landscape standout. Fast-growing and long-lived tree of lowlands and old fields. Mature height - 70' and mature width - 65'. Prefers full sun and a moist, rich soil.
